

ANOMALY-T4 - Technical information

Case material	316L grade 4441 steel, 100% recycled
Crystal	sapphire on the front and back. Anti-reflective treatment
Display	hours, minutes, seconds
Nighttime display	Super-LumiNova® on hands and indices
Watertight	10ATM (100 meters). Individually tested in a pressurized chamber
Weight	81 grams / 111 grams with leather strap
Dimensions	Diameter: 41.5mm / thickness: 11.2mm
Skeleton movement	Sellita SW200-1 S a
Number of jewels	26
Frequency	28,800 vibrations per hour / 4[Hz]
Precisions	-7/+7 seconds per day
Power reserve	38 hrs (when not in use)
Stop-seconds function	yes
Shock absorber	Incabloc
Winding	automatic via oscillating weight. Bidirectional winding
Precision testing	fine-tuned in 3 positions
